MORE INFO: <http://uraniumfilmfestival.org/en/uranium-film-festival-in-tucson>

To see the complete SW film festival: www.uraniumfilmfestival.org

To learn how to endorse efforts to end nuclear war threat <https://www.preventnuclearwar.org>

These films tell part of the story of the effects and heroic resistance largely on Native American lands to uranium extraction industries. Nuclear materials affect the environment and nuclear war threatens the planet. A UN Treaty on the Prohibition of Nuclear Weapons signed by 122 nations in July 2017 is gaining momentum world wide to end nuclear war ever again. Physicians for Social Responsibility is committed to the mission of abolishing nuclear weapons, addressing climate change and health effects of toxic chemicals in environment. To this end PSR-AZ is working locally on “Back From The Brink” campaign. We ask your organization to sign on!
